I am interested in a data analyst internship. I want to learn about what a data analyst does in a real world application. I am excited to work in a group setting with others that are passionate about the projects they are working on. I enjoy working together with other team members on projects that can have a business impact.

EXPERIENCE

Home Depot, Boise — *Hardware Associate*

Summer of 2021

Assigned to the hardware department to assist customers in product selection.

Provided inventory and product placement support for the department.
